

Program Evaluation: Models and Techniques

(Educational Psychology 380P)

Evaluation Models and Techniques is a course that teaches basic concepts and procedures for evaluating educational and human service programs. The course serves as a graduate-level introduction to program evaluation for students preparing for careers in education and the social and behavioral sciences. Prerequisites for the course are an intermediate knowledge of statistics and measurement (analysis of variance, reliability and validity) and familiarity with a specific program to be used in applying the evaluation concepts presented during the course.

Some Facts About the Course

1. Students study major evaluation concepts and learn methods and techniques for implementing evaluation studies in applied contexts.
2. Students are expected to assimilate and be able to discuss critical literature in the theory and practice of evaluating educational and human service programs.
3. Readings from a variety textbooks and journals serve as the framework for class lectures and class discussions.
4. Students are expected to relate the evaluation concepts presented during the course to their major field of study and to a specific program within that field.
5. Students can expect to have their ideas critiqued by the instructor and other students.
6. Students are responsible for a term paper and some students will be responsible for an informal class presentation about their term paper. In addition each student is required to submit a copy of a journal, magazine or newspaper article of their own choosing related to an evaluation concept presented during the course.

Major Goals of the Course

1. To trace the contemporary development of evaluation in education and human service (students will be able to identify milestones and existing directions).
2. To examine the relationship between research and evaluation (students will be able to identify distinguishing and overlapping characteristics).
3. To present and synthesize evaluation strategies and concepts (students will be able to identify practical and theoretical models for evaluation).
4. To provide a description of evaluation methodologies (students will be able to identify and apply quantitative and qualitative tools for evaluation).
5. To present critical considerations on evaluation design, criteria for judging evaluation, and measurement problems related to evaluation (students will be able to distinguish adequate from inadequate evaluation designs).

Course Instructor

Gary Borich

Department of Educational Psychology. Office hours: Fall/Spring 12-2 Th; Summer: 12-1, MWF, 506M. 471-0546

Required Texts

Review Notes for Program Evaluation: Models and Techniques(2011)
Available from Able's Reprints 715 West 23rd 472-5353

Program Evaluation, 5th edition. (2010) Royse, D., Thyer, B., Padgett, Belmont, CA: Wadsworth. Available from the Coop Bookstore.

E-mail: GaryBorich@mail.utexas.edu

Evaluation Models and Techniques *

First Meeting

Roles and Contexts of Evaluation

- A. Discussion of course outline
- B. Introductory concepts

Second Meeting

Theoretical Orientations to Evaluation

- A. Royse, D., Thyer, B., & Padgett, D. Introduction. In Program Evaluation, 5th edition. Belmont, CA: Wadsworth, 2010. Chapter 1, pp. 1-33.
- B. Scriven, M. Evaluation as a discipline. Studies in Educational Evaluation, summer, 1994, pp. 147-166.
- C. Borich, G. and Jemelka, R. Definitions of program evaluation and their relation to instructional design. Educational Technology, August, 1981, pp. 31-38. (In Review Notes)

* Digital versions of readings not in the Review Notes are posted on Blackboard

Third Meeting

Strategies and Models (Part I)

- A. Stake, R. Program evaluation, particularly responsive evaluation. In D. Stufflebeam, G. Madaus, & T. Kellaghan, Evaluation Models: Viewpoints on Educational and Human Service Evaluation. Boston: Kluwer-Nijhoff, 2000, pp. 287-311.
- B. Steinmetz, A. The discrepancy evaluation model. In D. Stufflebeam, G. Madaus, & T. Kellaghan, Evaluation Models: Viewpoints on Educational and Human Service Evaluation. Boston: Kluwer-Nijhoff, 2000, pp. 121-143.
- C. Royse, D, et al. Formative and process evaluation. In Program Evaluation, 5th edition. Belmont, CA: Wadsworth, 2010. Chapter 5, pp. 108-140.

Fourth Meeting

Strategies and Models (Part II)

- A. Stufflebeam, D. The CIPP model for program evaluation. In D. Stufflebeam, G. Madaus, & T. Kellaghan, Evaluation Models: Viewpoints on Educational and Human Service Evaluation. Boston: Kluwer-Nijhoff, 2000, pp. 279-315.
