EDP 384—Hierarchical Linear Modeling

EDP 384—Hierarchical Linear Modeling Fall 2015	
<i>Instructor:</i> Keenan Pituch, Ph.D.	<i>Meeting Times:</i> T, TH: 12:30 – 2:00
<i>Office:</i> SZB 538C	<i>Meeting Rooms:</i> SZB 432
<i>Phone:</i> (512) 471-0672	<i>Office Hours:</i> M&W: 9:30 to 11:00; other times by appointment
	<i>E-Mail:</i> kpituch@austin.utexas.edu
<i>TA:</i> Rebecca Steingut	<i>Office Hours:</i> T, TH: 10:30 to 12:30
<i>Location:</i> SZB 352A	<i>E-Mail:</i> rebeccarosesteingut@gmail.com

I. Course Description

The course provides an introduction to the basic concepts and applications of hierarchical linear models. The course will cover applications in organizational analysis (e.g., school effects research), growth curve modeling, and meta-analysis, as well as introduce models for dichotomous outcomes. The general objective of the course is that students will be able to understand when and why hierarchical linear models should be used and effectively apply them to a wide variety of situations. During the course, students will be asked to do the following:

- ☐ explain conditions that prompt use of a multilevel analysis,
- ☐ specify an appropriate analysis model given research questions and various study designs,
- ☐ conduct analyses using the HLM software program,
- ☐ interpret analysis results correctly, and
- ☐ communicate analysis results effectively in writing.

During lectures, emphasis will be placed on understanding statistical concepts, specifying analysis models, and interpreting results. During lab, students will learn to use statistical software to analyze data from multilevel designs.

II. Textbook

Raudenbush, S. W. and Bryk, A. S. (2002). *Hierarchical linear models: Applications and data analysis methods* (2nd ed.). Thousand Oaks, CA: Sage Publications.

III. Requirements

1. In-class exam over unit I
2. In-class exam over unit II
3. In-class exam over unit III
4. In-class exam over unit IV

IV. Grading Scale

The grade you receive for this course will be based on the percent of points you obtain on the four tests, with each assessment comprising 25% of the course grade. The average score on these assessments will be used to determine your course grade based on the lower limits of the following scale:

A	93-100%
A-	90-92%
B+	87-89%
B	83-86%
B-	80-82%
C+	77-79%
C	73-76%
C-	70-72%
D	66-69%
F	< 66%

V. Course Schedule and Policies

A. Tentative Course Schedule

Date	Unit	Readings
August 27	Introduction	Pituch, Ch. 1; R & B, Ch. 1
September 1, 3	Basic Concepts	Pituch, Ch. 2; R & B, pp. 38-42, 56-58, 63-64
September 8, 10	Continued	
September 15, 17	Test 1 (17th) and Organizational Analysis	Ch. 4
September 22, 24	Two-Level Models	Ch. 4
September 29, October 1	Centering and Use of Software	
October 6, 8	Assumptions	Ch. 9
October 13, 15	Other Applications	Ch. 5
October 20, 22	Test 2 (20th) Growth Curve Modeling	On-line materials
October 27, 29	Linear Models and Nonlinear Models	
November 3, 5	Intensive Longitudinal Models	
November 10, 12	Intensive Longitudinal Models and Test 3 (12th)	
November 17, 19	Binary outcomes	On-line materials & Ch. 10, pp. 291-309
November 24, 26	Binary outcomes (<i>Thanksgiving on 26th</i>)	
December 1,3	Binary outcomes and Test 4 (3rd)	

B. Policies

The core values of The University of Texas at Austin are learning, discovery, freedom, leadership, individual opportunity and responsibility. Each member of the University is expected to uphold these values through integrity, honesty, trust, fairness, and respect toward peers and community.

The University of Texas at Austin provides upon request appropriate academic accommodations for qualified students with disabilities. For more information, contact the Office of the Dean of Students at 471-6259, 471-4641 TTY. If they certify your needs, I will work with you to make appropriate arrangements.

A student who misses an examination, work assignment, or other project due to the observance of a religious holy day will be given an opportunity to complete the work missed within a reasonable time after the absence, provided that he or she has properly notified the instructor. It is the policy of the University of Texas at Austin that the student must notify the instructor at least fourteen days prior to the classes scheduled on dates he or she will be absent to observe a religious holy day. For religious holy days that fall with the first two weeks of the semester, the notice should be given on the first day of the semester. The student will not be penalized for these excused absences, but the instructor may appropriately respond if the student fails to complete satisfactorily the missed assignment or examination

within a reasonable time after the excused absence.
